Coronavirus Disease 2019 (COVID-19)

The Cal OES State Operations Center (SOC) activated 03/02/20 at 0700 hours in support of the California Department of Public Health (CDPH) Medical Health Coordination Center's (MHCC) statewide response to COVID-19. Cal OES will continue to provide resource coordination for the COVID-19 event, as well as situation status reporting and advance planning across multiple areas.

Situation Overview

- **California State of Emergency Proclamation**

On 03/04/20, Governor Gavin Newsom declared a State of Emergency for California, as a result of the global COVID-19 outbreak that began in December 2019, to make additional resources available, formalize emergency actions already underway across multiple state agencies and departments, and help the state prepare for broader spread of COVID-19.

- **CDPH Statewide Travel Advisory**

As of 06/15/21, CDPH and the CDC recommend delaying travel until persons are fully vaccinated. For more information: [CDC Travel Guidelines](#)

- Please see attached California Health & Human Services (CHHS) Agency / Cal OES Joint Situation Report for additional details

SITUATION SUMMARY

2021 July Extreme Heat Event

- On 07/08/21, Phase II of the Heat Contingency Plan was activated due to forecasts of dangerous and excessive heat.
- A 1000-hour Statewide Conference Call has been coordinated starting 07/07/21 through 07/09/21 with plans to continue the calls into the weekend as the situation warrants.
 - The Conference Call is in response for potential impacts due to the heat, and weather models predicting possible higher temperatures than the Late June 2021 Heat Event.
- On 07/07/21 the Sit Cell activated to Enhanced Watch for Incident Reporting for the July 2021 Heat Event.

2021 July Electrical Transmission Emergency

The California Independent System Operator (CAISO) has declared a Stage 2 System Emergency Notice and a Flex Alert due to extreme heat and wildfires.

- CAISO has extended a statewide Flex Alert for a second day to avoid a possible shortage of energy as extreme heat in California and a growing wildfire in Southern Oregon threatening transmission lines continue to strain the state's electric grid.
- When the Flex Alert is in effect again on Saturday, 07/10/21, between 1600 hours and 2100 hours, consumers are strongly encouraged to conserve energy.
- A Flex Alert is a call for consumers to voluntarily conserve electricity when there is a predicted shortage of energy supply, especially if the grid operator needs to dip into reserves to cover demand. When consumers reduce electricity use at critical times, it can prevent more dire emergency measures, including possible power outages. Go to flexalert.org for more information.
- All three utilities (PG&E, SCE, and SDG&E) activated their EOCs and were assigned a Cal OES Representative for the Stage 2 Emergency.
- CAISO issued a Restricted Maintenance Operations notice for today 07/10/21 from 0600 hours – 2200 hours.
 - Requires generators and transmission operators to postpone any planned outages for routine equipment maintenance, ensuring all grid assets are available for use.
- CAISO issued a CAISO Grid WARNING Notice, effective 07/10/21, 1700 hours through 2100 hours.

WEATHER KEY POINTS

07/10/21 - 07/16/21

Saturday-Friday

- Hot temperatures continue for much of interior and southern California, with **high to very high heat risk** impacts through Monday
 - High temperatures across much of the Central Valley and interior southern California will range from upper 90s to around 115 for the weekend, with areas into the 120s in the southern deserts and near 130F at Death Valley.
 - Excessively warm overnight temperatures are also expected through Monday. **Overnight low temperatures will range from 15-25 degrees above normal for early-to-mid July.**
 - **Many locations will approach or break daily records throughout the event, both for daytime high temperatures and high overnight low temperatures.**
 - **Compared to recent significant heat waves this year, the high temperatures will be slightly warmer than recent events, and the overnight lows will be several degrees warmer than previous events.**
 - Slightly cooler but still above normal temperatures expected for the middle of next week.
- Breezy conditions each afternoon will persist in the foothills and mountains, bringing periods of elevated fire weather conditions
- Isolated thunderstorms are possible as across southeastern California and across the Sierra, though precipitation amounts are not expected to be significant
 - Northern, coastal and most southern California locations will remain dry throughout the week
